

Broadcast Services

BROADCAST

From Engineering
to Live Operation

KATHREIN

Service Portfolio

The spectrum of our services ranges from planning to implementation to operation. This also covers maintenance, troubleshooting and repair. We care for all components of the complete antenna system, i.e. the antenna array, RF-cables, multiplexers and switching panels as well as measuring and monitoring systems.

Training

Delivering knowledge

- Antenna basics and technology training
- Service and measurement training
- Product handling and installation training (optionally on-site)

Maintenance

Preservation of assets

- Technical support
- Hardware maintenance
- On-site support

Operation

High system availability

- Regular checks of RF-components and mechanical structure
- Troubleshooting and fault elimination
- Emergency service
- Regular supervision and maintenance
- Antenna realtime monitoring by **"Kathrein Smart Monitoring"** 
- Repair service
- RF-measurements, data logging, reports
- Highly accurate signal analysis with the **"Kathrein Signal Analyser"** 
- Coverage database

Since numerous broadcast antenna systems are equipped with Kathrein antennas all over the world, we bring in very good technical expertise and knowledge about antenna towers and sites. A large number of our professional staff also have official certifications to work high up on antenna towers.

Planning

Optimisation of coverage

- Coverage calculations
- Network planning
- Site survey
- Technical proposals
- Structural calculations (static/dynamic)
- Negotiations with infrastructure companies and authorities
- Site acquisition
- System planning
- Network optimisation

Material Logistics

Material and spare part logistics

- Storing of consumable items
- Spare part management
- Accessories

Implementation

Complete realisation of projects

- Project management
- System integration
- Turnkey projects
- Installation
- Commissioning
- Infrastructure implementation
- Security management
