

Phase-Out Period 2011

Dear Customers,

as announced earlier, we decided to include a pair of our standard clamps in the scope of supply of our base station antennas. To indicate that change the standard part numbers were extended with a version code (e.g. 742215V01). The previous part numbers as listed below will be phased-out during 2011. Please be informed that we are only selling off the remaining warehouse stock. These products won't be manufactured anymore.
